

Curtis Kingery Jr.

Target Role: Operations Data Analyst

Daleville, VA – (540)-206-0164 - curtkingery@gmail.com

[GitHub Portfolio](#) - [LinkedIn Profile](#)

Professional Summary

Management Consultant with a data and analytics focus, using data to identify operational inefficiencies, improve processes, and support data-driven decision-making in medical supply. Proficient in SQL, Excel, Power BI, and R, with strong attention to detail in cleaning, validating, and interpreting large datasets to identify trends and support accurate decision-making. Known for communicating insights clearly, organizing complex information, and applying problem-solving skills to translate business needs into structured analysis and reporting outputs while maintaining data confidentiality. Seeking to transition into an operations-focused data analyst role to deepen technical expertise and directly support continuous improvement initiatives.

Core Skills & Competencies

Data Analysis & Statistics: Querying Databases, Data Cleaning, Data Transformation, Statistical Analysis (Descriptive/Inferential Statistics), Data Interpretation, Regression Analysis, Hypothesis Testing

Data Management & Quality: Data Collection (Validation/Standardization), Data Integrity, Data Quality Assurance, Data Remediation, Data Governance/Compliance, Data Documentation

Tools & Technologies: Excel, SQL, Power BI, Tableau, R (tidyverse), Power Query

Reporting & Visualization: Dashboards, Data Visualization, Report Development, KPI Tracking, Reporting to Business Stakeholders

Process Improvement & Operations: Process Analysis, Continuous Improvement, Root Cause Analysis, LEAN Principles, DMAIC (Define, Measure, Analyze, Improve, Control)

Systems & Workflow: Data Integration, ETL Processes, Workflow Automation (Power Automate)

Professional Skills: Attention to Detail, Communication, Problem Solving, Organization, Adaptability, Commitment to Accuracy, Data Confidentiality

Professional Experience

Management Consultant (Data & Analytics Focus)

SC Vistas (Supporting Deloitte – VHA Medical Supply Program Office) | 2024 – Present

- Collected, cleaned, and validated 10K–100K+ records per reporting cycle across multiple systems to ensure data accuracy and reliability for operational reporting
- Connected to databases and performed exploratory data analysis and trend identification using SQL, Excel, and Power BI, interpreting results and communicating findings clearly to internal stakeholders, supporting operational decision-making
- Developed dashboards and reports used by business stakeholders to monitor process performance, delays, and operational bottlenecks
- Identified data quality issues and supported data remediation efforts with internal stakeholders, improving consistency and usability of datasets across reporting workflows
- Automated recurring data processing and reporting tasks using Excel and Power Automate, connecting directly to databases, reducing manual effort, and improving reporting timeliness
- Maintained organized documentation of data sources, transformation logic, and analysis outputs, ensuring consistency, accessibility, and alignment with data governance and confidentiality requirements
- Collaborated with cross-functional teams to understand requirements, communicate analytical findings, and apply problem-solving to deliver structured reporting outputs
- Contributed to process improvement efforts by analyzing operational data to identify inefficiencies and support continuous improvement initiatives
- Assisted in validating reporting outputs and ensuring alignment with stakeholder requirements prior to deployment

Analytics Lead (Workstream Support & Training)
SC Vistas / Deloitte Project Team

- Supported team-wide adoption of data analysis best practices by training 15 team members, demonstrating clear communication, organization, and adaptability in guiding diverse users
- Standardized reporting approaches across multiple teams, improving consistency and comparability of operational metrics
- Built repeatable data transformation processes using Power Query, enabling more efficient data preparation for analysis and visualization
- Delivered reporting outputs used in leadership discussions, supporting data-informed operational decisions

Key Projects

- **Enterprise Operations Dashboard**
 - Tools: SharePoint Lists, Power BI
 - [GitHub Link to Project](#)
- **Automated Reporting & Distribution System**
 - Tools: SQL, Power Automate, Excel

Education

MBA (In Progress) – Longwood University, *Track in Data & Analytics* | Jan 2026 - Current
B.S. Psychology, Minored in Statistics – Roanoke College | May 2021

Certifications

Certified Supply Chain Professional (CSCP) ASCM	Jul 2023
Google Data Analytics Professional Certificate Google	Feb 2024
Generative AI Leader Professional Certificate Google Cloud	Dec 2025
